

Included in the Box:

Also included is a magnet to attach your ULTRA 2.0 to the lid of your humidor.

ASSEMBLY & STARTING YOUR CIGAR OASIS ULTRA 2.0

- 1) Remove all contents from the box and remove all plastic wrap.
- 2) Locate the water cartridge which comes prefilled with **distilled** water and remove all tape.
- 3) Place the cartridge onto the control top until the clip locks into place.
- 4) The ribbon cable comes already attached to the connector. From the back of the humidor, slide the free end of the ribbon cable between the hinges and while the *Cigar Oasis* is in the humidor connect it to the power port on the side of the unit with the blue side of the ribbon facing down.
- 5) Plug the Micro USB connector into the connector at the back of the humidor and plug the adapter into the wall to power on your unit.

Cartridge Refill Instructions

- 1) Fill a bowl with **distilled water only** and submerge the cartridge in it for 4 minutes.
- 2) Take out the cartridge and let it stand on the countertop for another minute.
- 3) Empty all remaining water out of the cartridge so only damp foam remains. ****No water should drip out when the cartridge is held upside down. ****
- 4) Dry off the cartridge and put the unit back together.

USING YOUR CIGAR OASIS ULTRA 2.0

- Once the unit is put together and plugged in, it turns on and will read the current humidity. The unit is factory preset at 70% humidity. As soon as the humidity drops below 70% the fan will come on to add moisture to the humidor.
- To raise or lower the humidity settings use the **UP** or **DOWN** arrows. A few seconds after the adjustment the unit will go back to showing the current humidity level.
- When the unit needs to be refilled, it will flash **Lo H2O**.

By pressing the **SUN** button you can view the following information:

- Press 1 time to view TEMPERATURE. Use Up and Down arrows to select Celsius or Fahrenheit. To save your selection press the **SUN** button again.
- Press 2 times to view Average Humidity.
- Press 3 times to view LOW Humidity over 3 days (the unit will start at 0 until it has enough information to give an accurate reading).
- Press 4 times to view HIGH Humidity over 3 days (the unit will start at 0).

Battery Operation

If you unplug the ULTRA 2.0 or incur a power outage, it will automatically go on battery power.

Press **SUN** button 5 times to view battery charge level when connected to outlet.

Press **SUN** button 6 times until you see **Pon** to enter Power Save Mode (only available when operating on battery power). Use the down and up arrows to scroll through the Power Options and the **SUN** button to select the option.

- **Pon** is Power On.
- **SLP** is Sleep Mode. The display and fans will turn off. Hold the **SUN** button for 3 seconds to turn the unit back on.
- **PoF** is Power Off mode. This completely shuts down the unit and it will need to be plugged in to turn it back on.

Charging the battery - Plug the ribbon cable into the unit and let it run on outlet power for approximately 2 hours or until fully charged.

Optional Accessory

Wi-Fi

For instructions on the operation of the Wi-Fi module please refer to the Wi-Fi manual.

CALIBRATION INSTRUCTIONS

To set the unit to match another hygrometer, you may adjust the reading by up to 9% (+ or -) on your **Cigar Oasis ULTRA 2.0**.

- 1) Determine if you need to increase or decrease the reading on the *Cigar Oasis* Humidifier to match the reading on your separate digital hygrometer.
- 2) Press the **UP** and **SUN** button simultaneously and hold for 3 seconds to enter the Calibration Mode (Displays **U 0**).
- 3) Press **UP** button if you need to increase the reading on the humidifier to match the reading on your separate hygrometer OR Press the **DOWN** button if you need to decrease the reading on the humidifier to match the reading on your separate hygrometer.
- 4) Press **SUN** button to leave the Calibration Mode.
- 5) Allow the humidifier to run for at least an hour before you check if humidity level matches the other hygrometer.

If further re-calibration is necessary, follow the above procedures again. Re-calibration should not be done more than three times in a row.
